

General: What are the basic architectural components of {avatar_a}™?

The {avatar_a}™ - {edition_name} platform has the following physical components.

- The {avatar_a} server which
 - Maintains a repository of all virtual machines with appropriate annotations.
 - Provides a web based interface for users to interact with the platform.
 - Orchestrates on demand provisioning of virtual machines.
- A pool of managed hosts which
 - Are used to run the virtual machines as per user needs.
- A collection of thin clients which
 - Serve as end points for users to interact with their virtual environment via a web browser.
 - At some installations, managed hosts also double up as thin clients.

Unique solution ID: #1035
